DETAILED ACTION

Allowable Subject Matter

Claims 1-31 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record, Rajan, US Patent Application Publication 2002/0150263, Baumhauer, Jr. et al, US Patent 5,515,445 and Rosca et al, US Patent 7,088,831 does not teach nor suggest establishing an approximation function that characterizes the relationship between the locations of the microphones and their computed energy values and the using the function to estimate the energy of each frame and computing an estimated gain that compensates for the difference between the computed energy of the frame and its estimated energy. Rajan discloses a signal processing system comprising a microphone array 5-1 to 5-3 for inputting a set of audio frames and a spectrogram processing module 33 for determining the time delay between the microphones. As show in figure 6, there is a plot of the time delays versus distance between the microphones which is used to estimate the direction of arrival associated with the audio frames. However, there is no disclosure nor suggestion of establishing an approximation function and computing an estimated gain that compensates for the difference between the computed energy and estimated energy, as required by independent claims 1, 14, and 27. Baumhauer, Jr. et al teach a system for matching the sensitivities of microphones comprising a microphone array 101, 105 and processor 104. There is no teaching of a direction of arrival associated with an audio frame set. Rosca et al disclose a system for audio source separation comprising a calibration module for accounting for the dissimilar microphones in a microphone array. However the reference does not disclose

nor suggest estimating energy in an audio frame and estimating gain based on computed energy and estimated energy.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
